

FUSION PANEL CONFIGURATIONS

DESIGN • FABRICATE • ELEVATE

Every Fusion interior is built from individually framed panels. Custom Fusion aluminum extrusions frame each panel section and butt together to form one continuous system, mounted with concealed fasteners for a clean, secure installation.

Recessed corner reveals, a base and frieze and on select designs a stainless chair rail complete the cab.

Fourteen standard configurations follow.

Customers can choose from a wide range of materials for their panel finish - laminate, real wood veneer, decorative metals, glass, and even stone - allowing them to create a custom elevator they can truly call their own.

FRAME & TRIM FINISHES

COMPONENT	STANDARD FINISH OPTIONS
Fusion aluminum frames	Natural polished aluminum · Black powder coat · Bronze powder coat
Base & frieze	Stainless steel · Bronze · Custom powder coat
Handrail & Chair rail	Stainless steel Flat Bar or Tube · Bronze · Custom powder coat
Corner reveals	Stainless steel · Bronze · Custom powder coat
Ceiling	Solid Plain (Stainless steel · Bronze · Laminate) or Welded Aluminum Frame (Aluminum · Custom powder coat)

ANATOMY OF A FUSION CAB

1 Frieze

Metal band spanning the top of the panel system, below the ceiling. Stainless steel, bronze or custom powder coat.

2 Fusion Aluminum Frames

Each panel section is individually framed with custom Fusion extrusions that butt together to form the system; concealed fasteners on the back of every frame provide secure mounting. Natural polished aluminum, black or bronze powder coat.

3 Corner Reveal

Recessed reveal at each wall corner. The only true reveal in the system. Stainless steel, bronze or custom powder coat.

4 Handrail & Chair Rail

On select configurations a horizontal stainless chair rail carries the handrail; other designs mount the handrail directly to the panels. Rail styles on the Handrails page.

5 Base

Metal base at the floor line. Stainless steel, bronze or custom powder coat to match the frieze and chair rail.

6 Ceiling

Solid plain (stainless, bronze or laminate) or welded aluminum frame (aluminum or powder coat). Recessed, perimeter or strip LED lighting depending on ceiling style. Options on the Ceilings page.

HOW TO SPECIFY

1 CHOOSE A CONFIGURATION

Select one of the fourteen Fusion panel configurations, PC-01 to PC-14.

2 SELECT PANEL & TRIM FINISHES

Panel faces in laminate, wood veneer, decorative metal, glass or stone; frame and trim finishes from the table at left.

3 COMPLETE THE CAB

Ceiling, lighting, handrails, protection pads and accessories from the pages that follow.

DECORATIVE INLAY

Finishes

Custom Image Glass

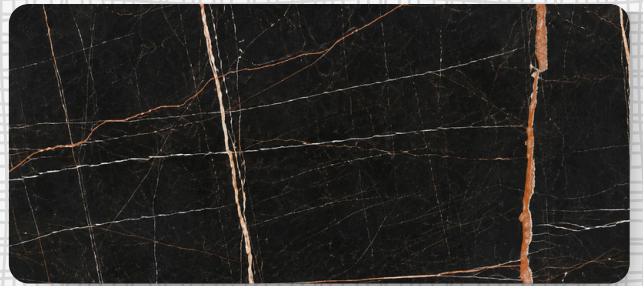

Any graphic, photograph, pattern or brand element can be printed at high resolution and sealed permanently inside the center layer of the glass, where it can never be scratched, peeled or cleaned away. Artwork can run continuously across multiple panels for a seamless mural.

SPECIFICATIONS

ITEM	STANDARD
Construction	Laminated safety glass- two 1/8" plies bonded around a decorative interlayer; 5/16" overall
Transparency	Opaque or obscured only; transparent glass is not used in cab interiors
Safety Mark	Permanent ANSI Z97.1 acid-etched safety-glazing logo in the lower corner of every panel for inspector verification
Surface Finish	Polished (standard) or frosted (acid-etched); available on every glass and mirror option
Color Matching	Colored glass can be matched to any RAL color or to any paint manufacturer code
Mounting	Panels are individually framed in Fusion aluminum extrusions and hung on concealed fasteners like every other Fusion panel

Finishes

POLISHED- SMOOTH, REFLECTIVE FINISH

HONED- SMOOTH, NON-REFLECTIVE FINISH

CUTAWAY – 1/4" NATURAL STONE VENEER ON ALUMINUM HONEYCOMB

Real Stone, Real Strong.

Genuine stone slab, engineered for the weight limits of an elevator cab.

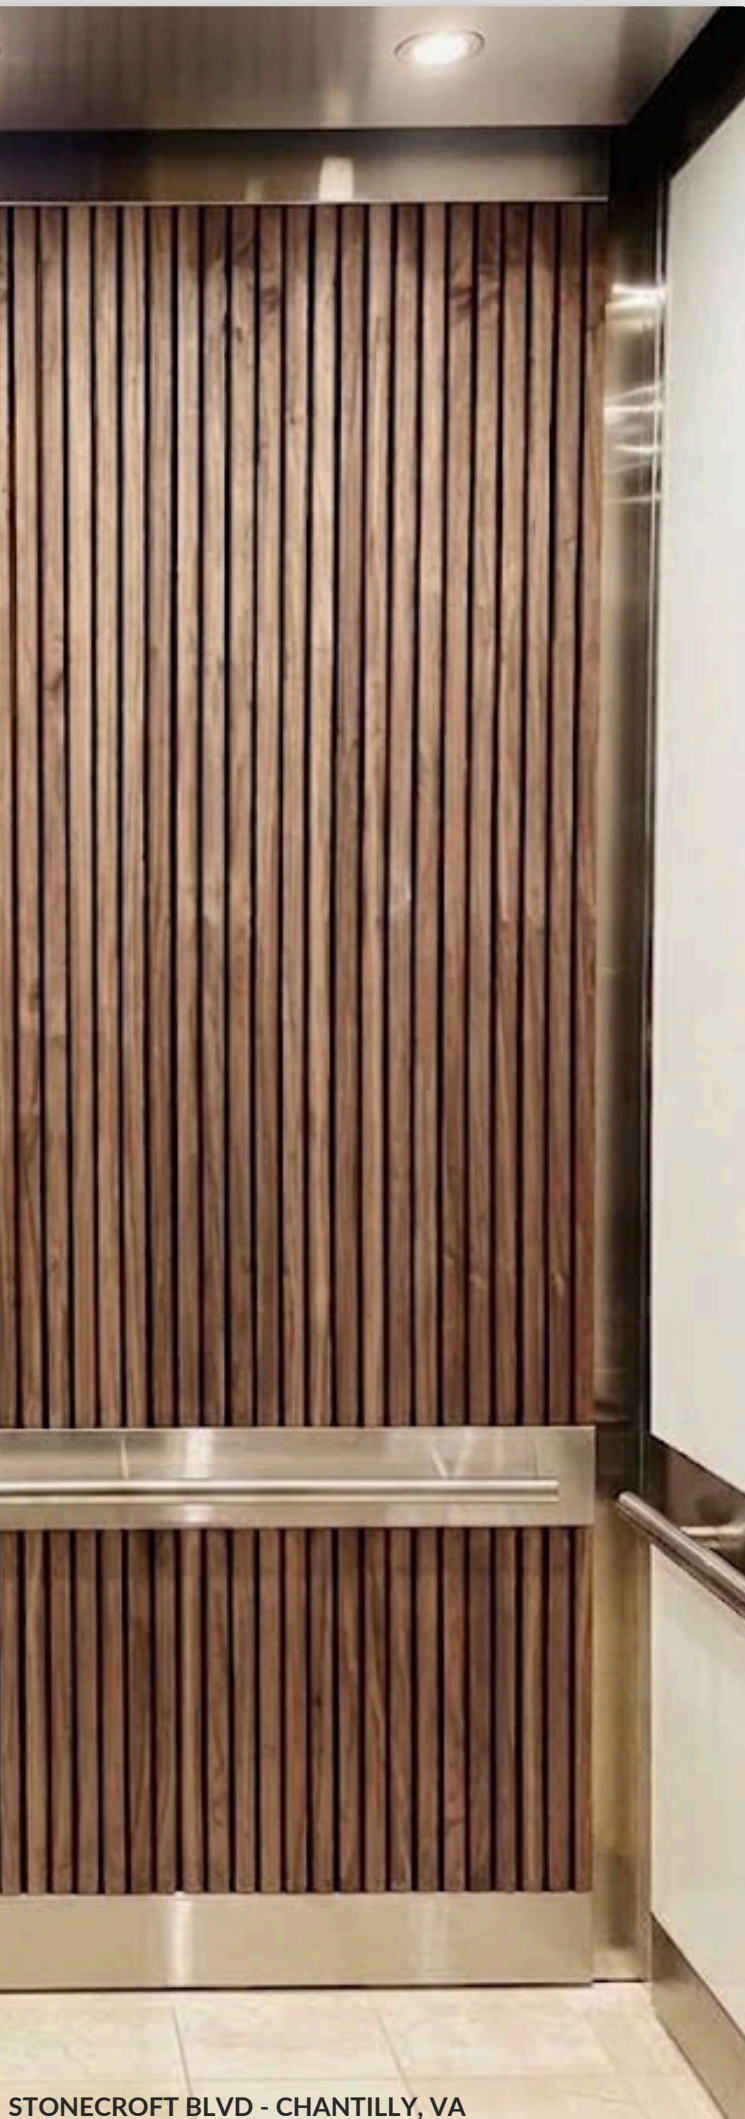

- 1 1/4" NATURAL STONE VENEER**
Custom cut from full slab- the same stone, color and veining you would specify for a lobby floor or wall.
- 2 ALUMINUM HONEYCOMB CORE**
An ultra-light aluminum honeycomb substrate bonded to the veneer adds strength and flexibility, making large format panels possible.
- 3 APPROX. 1/2" FINISHED PANEL**
Overall thickness once applied to the honeycomb backer a fraction of the weight of solid slab.

Natural Stone Panels

Stone gives a cab a permanence no other finish can match, but a full thickness slab is far too heavy for an elevator. Every CabCraft stone panel is cut from slab into a thin 1/4" veneer and bonded to an ultra-light aluminum honeycomb substrate, delivering large format stone panels at a fraction of the weight. The finished panel meets all ANSI code requirements for elevator interior finishes.

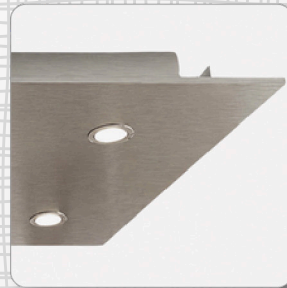

SPECIFICATIONS

ITEM	STANDARD
Construction	1/4" natural stone veneer bonded to an aluminum honeycomb substrate; approx. 1/2" overall
Weight	Ultra-light and a fraction of the weight of solid slab
Stone Selection	Any stone can be used; the stones shown are our value-priced, readily available standards
Slab Sourcing	Stone in stock at our supplier, or a pre-selected slab lot number for color and veining control
Surface Finish	Polished (smooth, reflective) or honed (smooth, non-reflective)
Code Compliance	Finished panels meet all code requirements for elevator interior finishes
Mounting	Panels are individually framed in Fusion aluminum extrusions and hung on concealed fasteners like every other Fusion panel
